Claims Allowed

Claims 11-20 are allowable over the prior art of record. The claims are allowable because the prior art does not anticipate nor render obvious the claimed combination of: a drive train for powering a mobile vehicle with a drive engine, which powers, on one hand, a drive input of a propulsion drive via a shiftable step-down transmission and, on another hand, an auxiliary drive output for driving at least a hydraulic pump, wherein before the auxiliary drive output there is arranged a transmission gear which adjusts a transmission ratio as a function of a required delivery volume of the hydraulic pump and as a function of a speed and of a load condition of the drive engine; or: A drive train for powering a mobile vehicle with a drive engine, which powers, on one hand, a shiftable step-down transmission for driving a propulsion drive via a hydrodynamic converter and, on another hand, an auxiliary drive output for driving at least an adjustable hydraulic pump, wherein the adjustable hydraulic pump is adjusted as a function of a required delivery volume of the hydraulic pump and as a function of speed and of a load condition of the drive engine.

No particular single feature of the claims renders the claims as a whole patentable. Only the claims taken as a whole combination is deemed new and unobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art Discussed

The examiner has considered the references cite by Applicant in his Information Disclosure Statement filed February 9, 2005. Arie '340 appears to be the most relevant. In figure 3 is shown a variable displacement pump 22a, but it does not appear to be responsive to the required delivery volume or the engine running characteristics.

The references cited by the examiner are deemed pertinent to applicant's disclosure. None of the references show all of the features of the claimed invention.

Conclusion

This application is in condition for allowance except for the following formal matters:

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the transmission gear that adjusts the delivery volume of the hydraulic pump as recited in claim 11, lines 4-6, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

Art Unit: 3681

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

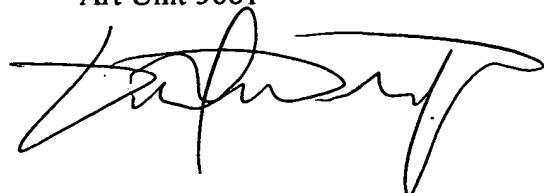

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
